SUBJECT INDEX

Volume 52 (1987)

A1 locus, anthocyanin biosynthesis, *Zea mays*, dihydroquercetin reductase, 7
Abscisic acid, somatic embryogenesis, maize, osmotic, plant growth regulator, structure-activity relationship, 81
—, —, polyembryogenesis, Douglas-fir, conversion, suspension cultures, 229
Agrobacterium rhizogenes, *Daucus carota*, *Pisum sativum*, *Nicotiana tabacum*, transformation, auxin, rhizogenesis, 195
Alternative oxidase, cyanide-resistant respiration, lipoxygenase, soybean embryonic axes, mitochondria, oxygen uptake, 33
Amino acid composition, etioplast, greening, protochlorophyllide oxidoreductase, 15
Anther development, esterase, isozymes, male sterility, low temperature, tomato, 187
Anthocyanin biosynthesis, *Zea mays*, A1 locus, dihydroquercetin reductase, 7
Artificial fusions, *Chlamydomonas*, non-Mendelian genetics, 73
ATPase, elongation growth, erythrosin B, plasma membrane, SW26, sucrose uptake, 1
Auxin, *Agrobacterium rhizogenes*, *Daucus carota*, *Pisum sativum*, *Nicotiana tabacum*, transformation, rhizogenesis, 195
Avena sativa, leaf development, senescence, vacuole isolation, vacuoplasts, 159

Base specificity, plant endonuclease, *Nicotiana tabacum* L, polyamines, 57
Bean, formaldehyde, heat shock, hydrogen peroxide, *N*-demethylation, peroxidase, 21
Binding, fructose-1,6-bisphosphatase, photosynthesis, chloroplast membranes, *Spinacia oleracea*, *Pisum sativum*, 41
Brassica napus, electroporation, kanamycin resistance, 111

Cadmium tolerance, tomato (*Lycopersicon esculentum*), cell-culture, cadmium uptake phytochelatins (PCs), 211
Cadmium uptake, tomato (*Lycopersicon esculentum*), cell-culture, cadmium tolerance, phytochelatins (PCs), 211
Carnation, stomata, vitreous plants, cell wall, tissue culture, 127
Cell-culture, tomato (*Lycopersicon esculentum*), cadmium tolerance, cadmium uptake phytochelatins (PCs), 211
Cell cultures, proanthocyanidins, condensed tannins, nitroso stain, 99
Cell potassium, CO_2 fixation, enzyme inhibitors, leaf epidermis, *Pelargonium zonale*, stomata, trichomes, 105
Cell-sorting, protoplast, flow-cytometry, *Solanum tuberosum*, 91
Cell wall, carnation, stomata, vitreous plants, tissue culture, 127
Ceratopteris, fern, gametophyte, mutant selection, salt tolerance, 49
Chitinase, *Colletotrichum lagenarium*, melon, mRNA, plant-pathogen interactions, 175
Chlamydomonas, artificial fusions, Non-Mendelian genetics, 73
Chloroplast membranes, fructose-1,6-biphosphatase, photosynthesis, binding, *Spinacia oleracea*, *Pisum sativum*, 41
CO_2 fixation, enzyme inhibitors, cell potassium, leaf epidermis, *Pelargonium zonale*, stomata, trichomes, 105
Colletotrichum lagenarium, chitinase, melon, mRNA, plant-pathogen interactions, 175
Condensed tannins, proanthocyanidins, cell cultures, nitroso stain, 99
Conversion, somatic embryogenesis, polyembryogenesis, Douglas-fir abscisic acid, suspension cultures, 229
Cotyledons, kinetin, poly(A)RNA, secondary structure, *Cucumis sativus* L., 67
Cucumis sativus L., kinetin, poly(A)RNA, secondary structure, cotyledons, 67
Cyanide-resistant respiration, alternative oxidase, lipoxygenase, soybean embryonic axes, mitochondria, oxygen uptake, 33
Cytokinin, gene expression, mRNA, pumpkin cotyledon, 169

Daucus carota, *Agrobacterium rhizogenes*, *Pisum sativum*, *Nicotiana tabacum*, transformation, auxin, rhizogenesis, 195
N-Demethylation, bean, formaldehyde, heat shock, hydrogen peroxide, peroxidase, 21
Dihydroquercetin reductase, anthocyanin biosynthesis, *Zea mays*, A1 locus, 7
Douglas-fir, somatic embryogenesis, polyembryogenesis, abscisic acid, conversion, suspension cultures, 229

Electroporation, *Brassica napus*, kanamycin resistance, 111
—, pollen germination, membrane permeability, fluorescence, 135
Elongation growth, ATPase, erythrosin B, plasma membrane, SW26, sucrose uptake, 1
Embryo culture, propagation, organogenesis, *Lycopersicon*, tomato, tissue culture, somatic embryogenesis, 237
Embryo sac (isolated), fertilization, fluorescence microscopy, sunflower, 147
Enzyme inhibitors, CO_2 fixation, cell potassium, leaf epidermis, *Pelargonium zonale*, stomata, trichomes, 105
Erythrosin B, ATPase, elongation growth, plasma membrane, SW26, sucrose uptake, 1
Esterase, isozymes, male sterility, anther development, low temperature, tomato, 187
Etioplast, amino acid composition, greening, protochlorophyllide oxidoreductase, 15

Fern, *Ceratopteris*, gametophyte, mutant selection, salt tolerance, 49
Fertilization, embryo sac (isolated), fluorescence microscopy, sunflower, 147
Flow-cytometry, protoplast, cell-sorting, *Solanum tuberosum*, 91
Fluorescence, electroporation, pollen germination, membrane permeability, 135
Fluorescence microscopy, embryo sac (isolated), fertilization, sunflower, 147
Formaldehyde, bean, heat shock, hydrogen peroxide, *N*-demethylation, peroxidase, 21
Fructose, *Zea mays* L., sucrose synthase, sucrose, glucose, 153
Fructose-1,6-bisphosphatase, photosynthesis, chloroplast membranes, binding, *Spinacia oleracea*, *Pisum sativum*, 41

Gametophyte, *Ceratopteris*, fern, mutant selection, salt tolerance, 49
Gel electrophoresis, immunoblotting, peroxidase, soybean, lectin, 141
Gene expression, cytokinin, mRNA, pumpkin cotyledon, 169
Glucose, *Zea mays* L., sucrose synthase, sucrose, fructose, 153
Greening, amino acid composition, etioplast, protochlorophyllide oxidoreductase, 15

Heat shock, bean, formaldehyde, hydrogen peroxide, *N*-demethylation, peroxidase, 21
Hydrogen peroxide, bean, formaldehyde, heat shock, *N*-demethylation, peroxidase, 21

Immunoblotting, gel electrophoresis, peroxidase, soybean, lectin, 141
Isozymes, esterase, male sterility, anther development, low temperature, tomato, 187

Kanamycin resistance, *Brassica napus*, electroporation, 111
Kinetin, poly(A)RNA, secondary structure, cotyledons, *Cucumis sativus* L., 67

Leaf development, *Avena sativa*, senescence, vacuole isolation, vacuoplasts, 159
Leaf epidermis, CO_2 fixation, enzyme inhibitors, cell potassium, *Pelargonium zonale*, stomata, trichomes, 105
Lectin, immunoblotting, gel electrophoresis, peroxidase, soybean, 141
Legume, *Lens culinaris*, plant regeneration, somatic embryogenesis, 223
Lens culinaris, legume, plant regeneration, somatic embryogensis, 223
Lipoxygenase, alternative oxidase, cyanide-resistant respiration, soybean embryonic axes, mitochondria, oxygen uptake, 33
Low temperature, esterase, isozymes, male sterility, anther development, tomato, 187
Lycopersicon, propagation, organogenesis, tomato, embryo culture, tissue culture, somatic embryogenesis, 237

Maize, abscisic acid, somatic embryogenesis, osmotic, plant growth regulator, structure-activity relationship, 81
Male sterility, esterase, isozymes, anther development, low temperature, tomato, 187
Melon, chitinase, *Colletotrichum lagenarium*, melon, mRNA, plant-pathogen interactions, 175
Membrane permeability, electroporation, pollen germination, fluorescence, 135
Mitochondria, alternative oxidase, cyanide-resistant respiration, lipoxygenase, soybean embryonic axes, oxygen uptake, 33
mRNA, chitinase, *Colletotrichum lagenarium*, melon, plant-pathogen interactions, 175
—, cytokinin, gene expression, pumpkin cotyledon, 169
Mutant selection, *Ceratopteris*, fern, gametophyte, salt tolerance, 49

Nicotiana, pollen, pollen diffusate, peroxidase assay, 29
Nicotiana tabacum, *Agrobacterium rhizogenes*, *Daucus carota*, *Pisum sativum*, transformation, auxin, rhizogenesis, 195
Nicotiana tabacum L, plant endonuclease, polyamines, base specificity, 57
Nitroso stain, proanthocyanidins, condensed tannins, cell cultures, 99
Nodules, *Solanum nigrum*, protoplasts, zeatin, plant regeneration, 117
Non-Mendelian genetics, *Chlamydomonas*, artificial fusions, 73

Organogenesis, propagation, *Lycopersicon*, tomato, embryo culture, tissue culture, somatic embryogenesis, 237
Osmotic, abscisic acid, somatic embryogenesis, maize, plant growth regulator, structure-activity relationship, 81
Oxygen uptake, alternative oxidase, cyanide-resistant respiration, lipoxygenase, soybean embryonic axes, mitochondria, 33

Pelargonium zonale, CO_2 fixation, enzyme inhibitors, cell potassium, leaf epidermis, stomata, trichomes, 105
Peroxidase, bean, formaldehyde, heat shock, hydrogen peroxide, *N*-demethylation, 21
—, immunoblotting, gel electrophoresis, soybean, lectin, 141
Peroxidase assay, *Nicotiana*, pollen, pollen diffusate, 29
Photosynthesis, fructose-1,6-bisphosphatase, chloroplast membranes, binding, *Spinacia oleracea*, *Pisum sativum*, 41
Phytochelatins (PCs), tomato, (*Lycopersicon esculentum*), cell-culture, cadmium tolerance, cadmium uptake, 211
Pisum sativum, *Agrobacterium rhizogenes*, *Daucus carota*, *Nicotiana tabacum*, transformation, auxin, rhizogenesis, 195
—, fructose-1,6-bisphosphatase, photosynthesis, chloroplast membranes, binding, *Spinacia oleracea*, 41
Plant endonuclease, *Nicotiana tabacum* L, polyamines, base specificity, 57
Plant growth regulator, abscisic acid, somatic embryogenesis, maize, osmotic, structure-activity relationship, 81
Plant-pathogen interactions, chitinase, *Colletotrichum lagenarium*, melon, mRNA, 175
Plant regeneration, *Lens culinaris*, legume, somatic embryogenesis, 223
—, *Solanum nigrum*, protoplasts, zeatin, nodules, 117
Plasma membrane, ATPase, elongation growth, erythrosin B, SW26, sucrose uptake, 1
Pollen, *Nicotiana*, pollen diffusate, peroxidase assay, 29
Pollen diffusate, *Nicotiana*, pollen, peroxidase assay, 29
Pollen germination, electroporation, membrane permeability, fluorescence, 135
Polyamines, plant endonuclease, *Nicotiana tabacum* L, base specificity, 57
Poly(A)RNA, kinetin, secondary structure, cotyledons, *Cucumis sativus* L., 67
Polyembryogenesis, somatic embryogenesis, Douglas-fir, abscisic acid, conversion, suspension cultures, 229
Proanthocyanidins, condensed tannins, cell cultures, nitroso stain, 99
Propagation, organogenesis, *Lycopersicon*, tomato, embryo culture, tissue culture, somatic embryogenesis, 237
Protochlorophyllide oxidoreductase, amino acid composition, etioplast, greening, 15
Protoplast, flow-cytometry, cell-sorting, *Solanum tuberosum*, 91
Protoplasts, *Solanum nigrum*, zeatin, nodules, plant regeneration, 117
Pumpkin cotyledon, cytokinin, gene expression, mRNA, 169

Rhizogenesis, *Agrobacterium rhizogenes*, *Daucus carota*, *Pisum sativum*, *Nicotiana tabacum*, transformation, auxin, 195

Salt tolerance, *Ceratopteris*, fern, gametophyte, mutant selection, 49
Secondary structure, kinetin, poly(A)RNA, cotyledons, *Cucumis sativus* L., 67
Senescence, *Avena sativa*, leaf development, vacuole isolation, vacuoplasts, 159
Solanum nigrum, protoplasts, zeatin, nodules, plant regeneration, 117
Solanum tuberosum, protoplast, flow-cytometry, cell-sorting, 91
Somatic embryogenesis, abscisic acid, maize, osmotic, plant growth regulator, structure-activity relationship, 81
—, *Lens culinaris*, legume, plant regeneration, 223
—, polyembryogenesis, Douglas-fir, abscisic acid, conversion, suspension cultures, 229
—, propagation, organogenesis, *Lycopersicon*, tomato, embryo culture, tissue culture, 237
Soybean, immunoblotting, gel electrophoresis, peroxidase, lectin, 141
Soybean embryonic axes, alternative oxidase, cyanide-resistance respiration, lipoxygenase, mitochondria, oxygen uptake, 33
Spinacia oleracea, fructose-1,6-bisphosphatase, photosynthesis, chloroplast membranes, binding, *Pisum sativum*, 41
Stomata, carnation, vitreous plants, cell wall, tissue culture, 127
—, CO_2 fixation, enzyme inhibitors, cell potassium, leaf epidermis, *Pelargonium zonale*, trichomes, 105
Structure-activity relationship, abscisic acid, somatic embryogenesis, maize, osmotic, plant growth regulator, 81
Sucrose, *Zea mays* L., sucrose synthase, fructose, glucose, 153
Sucrose synthase, *Zea mays* L., sucrose, fructose, glucose, 153
Sucrose uptake, ATPase, elongation growth, erythrosin B, plasma membrane, SW26, 1
Sunflower, embryo sac (isolated), fertilization, fluorescence microscopy, 147
Suspension cultures, somatic embryogenesis, polyembryogenesis, Douglas-fir, abscisic acid, conversion, 229

SW26, ATPase, elongation growth, erythrosin B, plasma membrane, sucrose uptake, 1

Tissue culture, carnation, stomata, vitreous plants, cell wall, 127
—, propagation, organogenesis, *Lycopersicon*, tomato, embryo culture, somatic embryogenesis, 237
Tomato (*Lycopersicon esculentum*), cell-culture, cadmium tolerance, cadmium uptake, phytochelatins (PCs), 211
Tomato, esterase, isozymes, male sterility, anther development, low temperature, 187
—, propagation, organogenesis, *Lycopersicon*, embryo culture, tissue culture, somatic embryogenesis, 237
Transformation, *Agrobacterium rhizogenes*, *Daucus carota*, *Pisum sativum*, *Nicotiana tabacum*, auxin, rhizogenesis, 195
Trichomes, CO_2 fixation, enzyme inhibitors, cell potassium, leaf epidermis, *Pelargonium zonale*, stomata, 105

Vacuole isolation, *Avena sativa*, leaf development, senescence, vacuoplasts, 159
Vacuoplasts, *Avena sativa*, leaf development, senescence, vacuole isolation, 159
Vitreous plants, carnation, stomata, cell wall, tissue culture, 127

Zea mays, anthocyanin biosynthesis, A1 locus, dihydroquercetin reductase, 7
Zea mays L., sucrose synthase, sucrose, fructose, glucose, 153
Zeatin, *Solanum nigrum*, protoplasts, nodules, plant regeneration, 117

Plant Science, 52 (1987) 247–248

VOLUME CONTENTS

Volume 52 (1987)

PHYSIOLOGY AND BIOCHEMISTRY

Effect of SW26 and erythrosin B on ATPase activity and related processes in *Ricinus* cotyledons and cucumber hypocotyls
by J.H. Ball, L. Williams and J.L. Hall (Southampton, U.K.) 1–5

The A1 (anthocyanin-1) locus in *Zea mays* encodes dihydroquercetin reductase
by A.R. Reddy, L. Britsch, F. Salamini, H. Saedler and W. Rohde (Köln and Freiburg, F.R.G.) 7–13

Amino acid composition of the enzyme NADPH:protochlorophyllide oxidoreductase
by U. Röper, H. Prinz and C. Lütz (Cologne, F.R.G.) 15–19

Hydrogen peroxide dependent *N*-demethylase activity in the leaves of normal and heat-shocked bean plants
by G. Gullner and E. Tyihák (Budapest, Hungary) 21–27

Interference of pollen diffusable substances with peroxidase catalyzed reaction
by V. Zárský, L. Ríhová and J. Tupý (Praha, Czechoslovakia) 29–32

Oxidative activities in soybean embryonic axes during germination
by S. Puntarulo, M.T. Beconi, R.A. Sánchez and A. Boveris (Buenos Aires, Argentina) 33–39

Binding of photosynthetic fructose-1,6-bisphosphatase to chloroplast membranes
by A.R. Andrés, J.J. Lázaro, A. Chueca, R. Hermoso and J.L. Gorgé (Granada, Spain) 41–48

GENETICS AND MOLECULAR BIOLOGY

Single gene mutants tolerant to NaCl in the fern *Ceratopteris:* characterization and genetic analysis
by T.R. Warne and L.G. Hickok (Knoxville, TN) 49–55

Characterization of DNase(s) activity in tobacco leaf extracts
by A. Zilberstein, T. Koch, Y. Altschuler, A. Lers and A. Zamir (Tel Aviv and Rehovot, Israel) 57–65

Kinetin modifies the secondary structure of poly(A) RNA in cucumber cotyledons
by G. Jackowski, A. Jarmolowski and A. Szweykowska (Poznán, Poland) 67–72

Artificially induced fusions between *Chlamydomonas reinhardtii* and *Chlamydomonas smithii*, transmission of non-Mendelian traits in the fusion products
by R.F. Matagne, M.-R. Michel-Wolwertz and D. Dombrowicz (Liège, Belgium) 73–79

CELL AND TISSUE STUDIES IN VITRO

The effect of auxin-like plant growth regulators and osmotic regulation on induction of somatic embryogenesis from elite maize inbreds
by K.R. Close and L.A. Ludeman (Palo Alto, CA) 81–89

Separation of intact and damaged plant-protoplasts by using a cell-sorter equipped with a two-channel piezo valve chamber
by M. Bromova and U.C. Knopf (Freiburg, Switzerland) 91–97

Histochemical assay of proanthocyanidin heterogeneity in cell cultures
by H.A. Stafford, H.H. Lester and R.M. Weider (Portland, OR) 99–104

Leaf epidermal tissue is unsuitable to use for studying biochemical aspects of stomatal functioning
by C.M. Willmer, A. Jamieson and K. Birkenhead (Stirling, U.K.) 105–110

Direct gene transfer by electroporation in *Brassica napus*
by P. Guerche, M. Charbonnier, L. Jouain, C. Tourneur, J. Paszkowski and G. Pelletier (Versailles, France and Basel, Switzerland) 111–116

Variations of morphogenetic behavior and plant regeneration in cultured protoplasts of *Solanum nigrum*
by D. Sihachakr and G. Ducreux (Orsay, France) 117–126

Malfunctioning stomata in vitreous leaves of carnation (*Dianthus caryophyllus*) plants propagated in vitro; implications for hardening
by M. Ziv, A. Schwartz and D. Fleminger (Rehovot, Israel) 127–134

In vitro electroporation of tobacco pollen
by K.P. Mishra, D.C. Joshua and C.R. Bhatia (Bombay, India) 135–139

GENERAL

Elimination of endogenous peroxides artifacts in immunoblots of plant extracts
by M.A. Villanueva and S. Malek-Heydayat (East Lansing, MI) ..... 141—146

A study of fertilization events in living embryo sacs isolated from sunflower ovules
by C. Zhou (Wuhan, China) ..... 147—151

PHYSIOLOGY AND BIOCHEMISTRY

Substrate inhibition of maize endosperm sucrose synthase by fructose and its interaction with glucose inhibition
by D.C. Doehlert (Peoria, IL) ..... 153—157

Isolation of vacuoles from developing oat leaves
by H.C.P.M. Van Der Valk, L.M. Plegt and L.C. Van Loon (Wageningen, The Netherlands) ..... 159—167

GENETICS AND MOLECULAR BIOLOGY

Cytokinin-induced changes in the population of translatable mRNA in excised pumpkin cotyledons
by C.-M. Chen, J. Ertl, M.-S. Yang and C.-C. Chang (Kenosha, WI) ..... 169—174

Induction of chitinases and of translatable mRNA for these enzymes in melon plants infected with *Colletotrichum lagenarium*
by D. Roby and M.-T. Esquerre-Tugaye (Toulouse, France) ..... 175—185

Esterase activity and isozymes during the ontogeny of stamens of male fertile *Lycopersicon esculentum* Mill., a male sterile stamenless-2 mutant and the low-temperature-reverted mutant
by S.K. Bhadula and V.K. Sawhney (Saskatoon, Canada) ..... 187—194

CELL AND TISSUE STUDIES IN VITRO

Morphogenetic and cellular re-orientations induced by *Agrobacterium rhizogenes* (strains 1855, 2659 and 8196) on carrot, pea and tobacco
by J. Bercetche, D. Chriqui, S. Adam and C. David (Paris and Orsay, France) ..... 195—210

Selection and characterization of cadmium tolerant cells in tomato
by B. Huang, E. Hatch and P.B. Goldbrough (West Lafayette, IN) ..... 211—221

Morphogenesis in lentil: plant regeneration from callus cultures of *Lens culinaris* Medik. via somatic embryogenesis
by P.K. Saxena and J. King (Saskatoon, Canada) ..... 223—227

Somatic embryogenesis and polyembryogenesis in Douglas-fir cell suspension cultures
by D.J. Durzan and P.K. Gupta (Davis, CA) ..... 229—235

Clonal propagation in vitro from immature embryos and flower buds of *Lycopersicon peruvianum* and *L. esculentum*
by R. Young, V. Kaul and E.G. Williams (Victoria, Australia) ..... 237—242

Subject Index Volume 52 ..... 243—246
Author Index Volume 52 ..... 247—248
Contents Volume 52 ..... 249—250
